## What They Say . . .

Very motivational and awesome message. You inspired me to challenge myself to find the positive in what initially appears to be negative. - *Workshop Participant, Retired School Teacher*

Collette, you have added so much to our lives in all the great things that you do and help us to accomplish! Your spirit is one that aligns with "things above" and that resonates through – in your ability to communicate effectively and purposefully. But not only that; when you speak it is with deliberation – because you truly have something to say. Your audience is enthralled because it that you have commanded their attention with the spoken word or simply because it's just plain ole' good!
